

Jona Cwejman

github.com/cwejman · mail@cwejman.dev · Gothenburg, Sweden

I'm a maker. I build from lived experience and gut feeling, and it tends to make things simple and true. My work sits where the technical meets the human, with people at the centre.

Growth, for me, is about what we choose to nourish. I want to build with people who choose the same things.

Alten Application Development Studio

ALTEN · 2024 – now

Holding the whole of each product together, from its foundations to the business and people around it. Lately, driving our AI pilot: knowledge first, AI directing.

leadership · architecture · infrastructure · back end · front end

Ramboll

Alten Application Development Studio · 2024 – now

A law-monitoring service moving to self-hosted infrastructure as code with observability, and grounding for AI-directed evolution.

leadership · infrastructure · architecture · back end

NIOX

Alten Application Development Studio · 2026 – now

Simplifying cloud infrastructure, with infrastructure as code and observability.

infrastructure

Save the Children

Alten Application Development Studio · 2024 – now

A collaboration platform for a human-rights initiative that scales on trust. Mentoring and teaching the people who join it.

leadership · teaching · front end · back end

Hug, Help Ukraine Gothenburg

leave from ALTEN · 2023

A year of logistics, partnerships and web work getting aid to Ukraine.

logistics · leadership · front end

SKF

ALTEN · 2022

Reformed an IoT integrations app so its team could deliver again.

front end · architecture

ABB Robotics

ALTEN · 2021

Drew the complete remake of an IoT platform's architecture, approved by stakeholders and architects.

architecture · front end · leadership

Bobby Digital

2018 – 2019

Led the front end side of a deep content management platform, from scratch to beta.

front end · leadership · architecture · infrastructure

Cwejman Sound

2017

A new synthesiser, from first drafts to production.

hardware · logistics

Icomera

intern · 2017

A mobile app and a Linux service on the telecom hardware behind train Wi-Fi.

hardware · back end · front end

Freelance

2014 – 2021

Websites and apps for art, food and law.
